Class X, 1st Division (81.8 %)

Experience

Software Trainee

New Delhi, India

Amner Infotechnologies Private Limited

Jun 2025 – Aug 2025

- Developed a full-stack Spring Boot application to integrate with an external API, demonstrating proficiency in layered architecture and managing persistent data with JPA and PostgreSQL.
- Engineered a dynamic front-end dashboard using Thymeleaf and Tailwind CSS, featuring server-side pagination and Excel export functions for comprehensive data management.
- Implemented secure token-based authentication systems for data synchronization across multiple geographic entities.

Certifications

Programming in Java (Elite Certification)

Oct 2025

- Completed a 12-week advanced certification by the Indian Institute of Technology Kharagpur (NPTEL), achieving an Elite status with a 79% score.

Cloud Computing Certification

Apr 2025

- Successfully completed a rigorous 12-week online certification course authorized by the Indian Institute of Technology Kharagpur via NPTEL.

Projects & Open Source Contributions

Academic Analytics and Archival System — Final Year Major Project

[GitHub](#) 

- Engineered a zero-dependency, standalone Linux application (Debian package) for automated academic data ingestion, analytics, and PDF transcript archival.
- Developed an asynchronous web-scraping engine using Java Spring Boot and Microsoft Playwright to extract dynamic university portal data and aggregate it into an embedded SQLite database.
- Integrated a secure REST API with JWT authentication and built a Business Intelligence dashboard using Thymeleaf and Chart.js to visualize institutional performance and identify "at-risk" students.
- Tools Used: Java 17, Spring Boot, Microsoft Playwright, SQLite, Spring Security, Thymeleaf.

PixelPatrol: UI Regression Testing Tool — 7th Semester Project

[GitHub](#) 

- Developed a self-hosted automated UI testing application to detect visual anomalies between Staging and Production web environments using algorithmic image comparison.
- Implemented a robust MVC architecture featuring a Singleton browser engine and thread-safe screenshot capture mechanisms for efficient, memory-safe batch processing.

- Optimized database retrieval utilizing custom JPQL queries and integrated OpenPDF to generate programmatic, compliance-ready reports with localized defect mapping.
- Tools Used: Java 21, Spring Boot 3.5, Microsoft Playwright, SQLite, Thymeleaf, TailwindCSS.

College ID Card Generator — Lead Developer

siwanscem.github.io 

- Developed an open-source web application for a college tech fest to generate customizable student ID cards.
- Enabled a direct download feature for generated ID cards, promoting a sustainable, paperless process.
- Tools Used: HTML, CSS, JavaScript, HTML5 Canvas

Technologies & Skills

Programming Languages: *Proficient:* Java, JavaScript, HTML, CSS | *Familiar:* Python, C, C++

Technologies & Frameworks: Spring Boot, Maven, PostgreSQL, SQLite, REST APIs, TailwindCSS

Developer Tools: Git, GitHub, Docker, Postman, Linux Environments, MS Office Suite

Achievements

National Finalist, Smart India Hackathon 2024 (Software Edition)

Dec. 2024

- Selected to compete at the national level at NIT Srinagar, developing a software solution for a complex real-world problem statement.
